EXPERIENCE

NPI SPORTS (Sports Performance & Recruiting Platform)

Boston, MA

Founding Engineer / CTO

06/26 - Present

- **Product Development:** Led technical architecture and product development for an early-stage sports platform, helping scale from launch to 1,000+ users and initial revenue within one month.
- **System Design:** Built and managed workflows transforming athlete performance data into evaluations, rankings, and the NPI Verified Score product.
- **Technical Leadership:** Own technical roadmap, architecture decisions, integrations, and engineering execution while working directly with founders on product strategy.

TRADECANNY (AI Trading Analytics Platform)

Boston, MA

Co-founder / Technical Product Lead

10/25 - Present

- **Product Development:** Built an AI-powered trading analytics platform that analyzes trading behavior and generates personalized insights and coaching.
- **Scale & Automation:** Developed automated trade analysis and user engagement workflows supporting 100+ users across free and paid tiers and 100,000+ trades analyzed.

BOX BYTE DIGITAL (B2B Growth Services Company)

Newton, MA

Co-founder

07/24 - 11/25

- **Company Growth:** Co-founded and scaled the business to 8 active clients, ultimately leading to the sale and acquisition of the company.
- **Client Delivery:** Built lead generation and appointment-setting systems that helped startup and small-business clients consistently generate qualified sales appointments.

GARTNER (Global Consulting & Advisory Firm)

Boston, MA

Summer Associate, Consulting

05/25 - 07/25

- **Operations Strategy:** Led stakeholder interviews and cross-functional analysis supporting a PeopleSoft-to-Workday ERP migration for a Fortune 500 health insurer.
- **Business Development:** Identified automation opportunities and developed a business case contributing to a \$1M consulting revenue opportunity.

YUNGSTEN TECH (Software Consulting Company)

Newton, MA

Co-founder

11/22 - 07/24

- **Product Development:** Co-founded a software consulting company and led client discovery, technical scoping, and development teams to deliver custom software products end-to-end.

STAPLES

Framingham, MA

Software Developer

07/23 - 03/24

- **Software Development:** Collaborated with Operations and Engineering teams to develop and enhance the “Pay-for-Performance” platform, improving warehouse performance tracking and operational workflows.
